Executive Summary

The purpose of the Office of Professional Licensure and Certification (OPLC) is to promote efficient professional licensing in the State of New Hampshire. Pursuant to RSA 310-A, in FY22 OPLC oversaw the administration of forty-six professional licensing boards; these boards, councils, and commissions (the “boards”) directly regulate their professions pursuant to the powers, duties, functions, and responsibilities granted to them by individual practice acts. OPLC provides administrative, clerical, business processing and recordkeeping support to these boards to assist in carrying out all statutory objectives in an efficient manner.

In addition, in FY22, OPLC directly regulated four professions, with the advice of advisory boards. OPLC had sole regulatory authority over one profession. To promote workforce opportunities in the State by increasing the interstate mobility of licensed professionals, in FY22 OPLC was also authorized to issue temporary and emergency licenses to individuals licensed in other jurisdictions.

In FY22, OPLC undertook several initiatives to meet its statutory objective of achieving efficient operations. These initiatives are detailed below.

Key Legislation

OPLC and the boards were very active during the FY22 legislative session. Pertinent bills enacted during FY22 that impact the OPLC and the boards include:

- SB 277, relative to emergency or temporary health care licenses. Senate Bill 277 permits OPLC to continue to issue emergency licenses to medical fellows, student nurses, and individuals with out-of-state licenses in good standing. Senate Bill 277 also converted all emergency licenses issued during the COVID-19 State of Emergency to permanent licenses.
- SB 313, relative to the authority of the office of professional licensure and certification to establish fees (requested by OPLC). Senate Bill 313, as originally drafted, would have repealed the provisions of all board practice acts that provided the boards with authority to promulgate rules regarding fees. OPLC sought to repeal these statutory provisions as it was granted authority to promulgate rules regarding fees in 2015. During the legislative session, Bill 313 was amended to eliminate only statutory fees.
- SB 330, establishing a committee to study and make recommendations relative to the office of professional licensure and certification and the licensure of professions under boards, councils, and commissions within the office and relative to the expiration of terms of the board of foresters members (requested by OPLC). As originally drafted, the bill would have permitted OPLC to issue permanent licenses to individuals who have licenses in good standing in other jurisdictions. The bill was amended during the legislative session to create a legislative committee to study the office and the boards and to create an oversight committee for five years.

- SB 382, relative to licensure requirements for telehealth services and relative to licensure of physicians and physician assistants through reciprocity agreements (OPLC requested). This bill clarifies that providers require a New Hampshire license to practice telehealth if the patient is physically located in New Hampshire. The bill also requires the office to seek reciprocity agreements with states that have substantially similar licensure requirements for physicians and physicians assistants.
- SB 397, relative to the mental health counseling compact and the interstate compact on the placement of children (OPLC requested). This bill adopted the mental health counseling compact.
- HB 1018, relative to the board of medical imaging and radiation therapy (OPLC requested). This bill converted the board of medical imaging and radiation therapy to an advisory board.
- HB 1182, relative to the board of court reporters (OPLC requested). This bill converted the board of court reporters to an advisory board.
- HB 1446, relative to the governing board of recreational therapists and relative to the governing board of respiratory care practitioners (OPLC requested). This bill converted the boards of recreational therapists and respiratory care practitioners to advisory boards.

OPLC FY22 Strategic Objectives

OPLC's primary strategic goals in FY22 included enhancing customer service, increasing licensure portability, and fulfilling all statutory and regulatory requirements.

Enhancing Customer Service

OPLC worked with the Department of Information Technology to procure funding under the American Rescue Plan Act to seek and obtain a new licensing portal. This portal will enable customer self-service and facilitate licensure in an expedited manner and is anticipated to be implemented in FY23–FY24.

OPLC developed a plan to restructure its Customer Service Unit to reduce the number of steps to connect licensees and customers with the appropriate staff member to field their questions. OPLC also began working on website enhancements to ensure that licensees and customers have access to necessary information online in a consumer-friendly format.

OPLC procured board management software to assist in organizing board meetings in an efficient way, to eliminate unnecessary waste caused by a paper-driven process, and to provide board members with the most up-to-date information as soon as possible.

OPLC continued to live-stream board meetings for members of the public and other external stakeholders to ensure transparency of operations and increase public participation.

Increasing Licensure Portability

OPLC pursued available compacts in FY22. OPLC also worked collaboratively with the Council of State Governments to assist in drafting a Social Work Compact.

OPLC and the Department of Veterans Affairs began working to develop proposals for the boards to consider, which will facilitate and promote expedited licensure for military servicemembers and their spouses. This initiative is anticipated to be complete in FY24.

Fulfilling all Statutory and Regulatory Requirements

In FY22, OPLC created a “Profiling Project,” to inventory all board practice acts and regulations to ensure that boards and the agency are fulfilling all legal obligations. This initiative, which is essential to establishing internal controls within the agency, is likely to be completed in FY24.

To ensure the boards consistently apply laws and regulations, OPLC developed a self-paced training module for board members. Training modules include topics such as RSA 541-A, RSA 91-A, and board members’ ethical obligations and constraints.

OPLC promulgated required rules on organizational rules (Plc 100s), investigations and complaints (Plc 200s), temporary licensure (Plc 801 and Plc 802), and fees (Plc 1000s).

Planning for the Future

Many of the initiatives that were successful in FY22 provide a foundation for continuous improvement of OPLC operations and acquisition of appropriate business solutions. In FY23, plans are in place for the development and implementation of an enforcement case management system, continued development of the OPLC online web presence, the procurement of a new online licensing portal and continuing education tracking solution, and resources for supporting the board partnerships.
