

What constitutes “compounding” of medications?

Compounding is NOT:

1. Crushing a tablet
2. Reconstitution of a medication

Compounding is considered:

Pharmacy Statute: NH RSA 318:1 Definitions

III-a. “Compounding” means the preparation, mixing, assembling, packaging or labeling of a drug or device as a result of a practitioner’s prescription drug order or initiative based on the pharmacist-patient-prescriber relationship in the course of professional practice or, for the purpose of, or as an incident, to research, teaching, or chemical analysis, but not selling or dispensing. “Compounding” also includes the preparation of drugs or devices in anticipation of prescription drug orders based on routine, regularly observed prescribing patterns. “Compounding” shall not include the reconstitution of powdered formulations before dispensing or the addition of flavoring.
