## **Informational Bulletin**

### **Electrical Inspections at NH Fairs July 8, 2014**

This informational bulletin is being provided to clarify under what circumstances electrical inspections will be performed by the State of New Hampshire Electricians' Board Inspectors during the fair. The process of reducing the ongoing electrical inspections at the fairs was started over a year ago. Limited hours of inspections were performed at the NH Fairs last year. Electrical inspections at NH fairs will not be performed on a scheduled basis this year. The inspections of the fairs should be performed by the local authority in the municipality where the fair is being held.

All electrical installations performed on the fairgrounds are required to be performed by a NH licensed electrician in a manner that is compliant with the current adopted edition of the NEC and any local requirements effective at the time of installation. If the need arises for a *specific electrical concern* regarding compliance with the National Electrical Code, NFPA 70 or licensing, the local authority or licensee may contact our office for assistance.
