Director

**Informational Bulletin**

**Listed Equipment**

September 12, 2017

The board has replaced the wording in the bulletin dated June 6, 2017 with the following to clarify the policy on the use of manufactured listed and non-listed equipment.

Based on the Board's decision that the equipment itself is not within the jurisdiction of the Board's purview, when the Electricians' Board inspector is performing a visual inspection for both listed equipment and non-listed equipment the inspection shall be limited to the equipment supply outlet or the equipment supply termination point (outlet). However, the installation instructions, listing and labeling requirements shall be enforceable under NFPA 70, National Electrical Code (NEC) section 110.3.

Listed equipment shall be required when the NEC mandates the use of listed equipment. When not supplied as part of the manufactured equipment, assembled electrical components installed within an enclosure are considered part of the electrical installation and shall be inspected for NEC compliance.
